

NutriSlim: GENETIC SCREENING FOR WEIGHT MANAGEMENT

Ever wonder why the same weight management regime works differently on different people? Perhaps we should stop blaming ourselves for being undisciplined and start looking into the underlying factors buried deep inside our genes.

Study shows that women on genetically-appropriate diet lose 2.5× more bodyweight & 2× more waist size

Genetic appropriate diet Genetic inappropriate diet

Source: Doppler Nelson, M. (2010) "Genetic phenotypes predict weight loss success: the right diet does matter."

Genetic Predisposition

There are tiny variations within our DNA that make us all slightly different from one another in eating behaviours and how our bodies respond to food.

The NutriSlim Package

- Effect of diet on weight control
- Effect of exercise on weight control
- Overweight potential
- Metabolism rate
- Satiety regulation
- Snacking
- Risk from saturated fats
- Monounsaturated fat
