

Laboratory Services for Wellness Spa

Introduction

Over the last decades, the new trends in international health-tourism alongside with traditional health services and wellness-fitness have become increasingly popular. The spa industry has grown by 7.7% annually from USD60 billion in 2007 to USD94 billion in 2013. In 2017, Malaysia is listed in the top 10 wellness tourism markets in the Asia Pacific with expenditure size at RM20.5 billion.

The growth of this industry has prompted standards adaptation such as ISO 17679:2016 for Wellness Spa with regards to hygiene and environmental health.

Please contact us to discuss your analysis requirement and we will assist you with the proposal.
